Sk Ramiz Raza

Ramizraza2313@gmail.com 6289338509 in/sk-ramiz-raza skramizraza.tech

SUMMARY

Full-stack developer specializing in building scalable web applications and AI-driven systems using React, Next.js, and Node.js. Experienced in designing secure, high-performance architectures with REST APIs, JWT authentication, and efficient data handling using MongoDB and Redis. Developed advanced projects integrating LangChain, computer vision (MediaPipe), and real-time systems, delivering intelligent, user-centric solutions. Strong focus on performance optimization, system design, and building production-ready applications.

EDUCATION

Bachelor of Computer Applications, Computer Applications

Netaji Subhash Engineering College • Kolkata, West Bengal • 2027

Bachelor of Science, Physics

Netaji Subhas Open University • Salt Lake City, Kolkata • 2027

SKILLS

Programming & Core: JavaScript (ES6+), TypeScript, Python, SQL
Frontend: React.js, Next.js, Redux Toolkit, Tailwind CSS, SCSS, Framer Motion
Backend & APIs: Node.js, Express.js, REST API Development, JWT Authentication
Database & Storage: MongoDB, Mongoose, Redis
Advanced Tech: LangChain, Mistral AI, MediaPipe (Computer Vision), AI Integration
Tools & DevOps: Git, GitHub, Vite, Postman, Axios, Docker (Basic)
Security & Validation: Zod, Bcrypt.js, Input Validation, Role-Based Access Control (RBAC)
Data & Visualization: Recharts, Data Analysis, JSON Handling

EXPERIENCE

Full Stack Web Developer

ARDENT COMPUTECH PVT LTD **October 2025 - December 2025**

- Built a scalable full-stack expense management system using React, Node.js, and MongoDB with secure JWT-based authentication.
- Designed RESTful APIs and optimized data handling to deliver real-time insights and high-performance user experience.

Web Design Intern

GAOTek Inc. **March 2025 - July 2025**

- Developed and maintained scalable web applications with a focus on performance, responsiveness, and clean architecture.
- Implemented end-to-end features across frontend and backend while collaborating in team-driven development environments following industry.

PROJECT

Lyra AI (Advanced Research & Synthesis Engine)

- Architected an agentic AI research engine using LangChain and Mistral AI to synthesize real-time web data into structured, citation-backed.
- Built real-time streaming responses with Socket.io, reducing perceived latency by ~40% and improving user interaction.
- Developed scalable REST APIs with Node.js and Express, implementing secure JWT authentication and Bcrypt-based encryption.
- Managed complex application state using Redux Toolkit, enabling persistent multi-session chat and seamless UX.
- Designed a high-performance UI with SCSS and Vite, ensuring sub-1s load times with strong validation using Zod for data integrity.

FinTrack – Full-Stack Enterprise-Grade Personal Finance Management Platform

- Built a full-stack finance platform using Next.js and TypeScript with optimized performance (+40% load speed).
- Developed analytics dashboards for expense tracking and financial insights.
- Implemented secure JWT-based authentication and RBAC system.
- Ensured data consistency using Zod validation and MongoDB schemas.

Cineva — AI-Powered Movie Discovery Engine & Gesture-Controlled Platform

- Engineered an AI-powered movie discovery platform using MediaPipe for real-time facial analysis and mood-based recommendations.
- Implemented gesture-controlled navigation via hand-tracking and custom React hooks for touchless user interaction.
- Built a high-performance backend with Redis caching, reducing API load and rate-limit triggers by ~70%.
- Optimized search and data flow using debouncing and Redux caching, lowering API overhead by ~60%.
- Built a secure RBAC admin system and responsive UI with Tailwind and Framer Motion, achieving 90+ Lighthouse scores and <1.5s FCP.
